

STEAM STERILIZABLE-IN-PLACE FERMENTOR INOCULATION PORT

Salient features :-

1. Suitable for safe transfer of inoculum from laboratory flask / bottle into fermentor in completely aseptic manner
2. Complete assembly sterilizable-in-place along with & during fermentor sterilization
3. Suitable use with all cultures (fungal, bacterial, yeast, actinomycete, etc.)
4. Highly user-friendly, negligible operator training required
5. Rugged industrial components used; no maintenance required
6. Minimum consumable / replacement parts
7. No health hazard or operating risk involved
8. Suitable for use with laboratory, pilot plant & production fermentors
